

**“How might we ignite pride in the Young People of Latrobe through connection, inspiration and success?”**

# **YOUTH SPACE LATROBE**

**The Co-Design Journey**

Youth Space Latrobe is a project of:

Department of Health and Human Service – Office for Youth and Inner Gippsland Area

Office for Youth Project Team:

John Kouvelas

Liz Bourke

Louise Grant

Oliver Tripodi

Angela Joseph

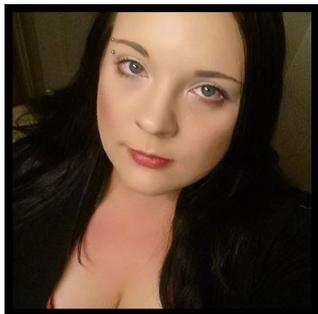

We acknowledge the traditional owners of country, the peoples of the Gunaikurnai nation. We pay our respects to them, their culture and their elders past and present.

Between September and December 2017 the Project Team engaged with Young People across the Latrobe Valley to form the Core Design Team to lead the development of Youth Space Latrobe. The Core Design Team has been open to any Young Person and has accepted new members throughout the Co- design journey.

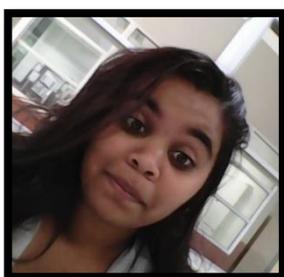

**Britney** is 23 years and lives in Morwell. Britney lives independently with her much loved cat. Britney says she has lived in Morwell all her life and went to local schools. She is currently the leader of a Morwell Rovers crew and involved in the organisation of many district Scouting activities including costume and makeup for the annual Strzelecki Showtime production. Britney also enjoys sewing and screen printing and has recently been mentoring a sewing group through her work readiness program. "The biggest thing I have gotten out of being involved is that I have discovered I have a voice and an opinion that is valued by others. This has strengthened my self-esteem and ability to talk to others."

**Amy** is 26 years and lives in Morwell. Amy moved to the Latrobe Valley about 3 years ago. Amy is a mum and an Aboriginal young woman of the Mununjali people from South Queensland. Amy found out about the Youth Space project through her TAFE VCAL class. She says she wanted to get involved to ensure young parents were included and supported to get the help they need. Amy has found her involvement in the Youth Core Design Team to be really worthwhile, "it's helped improve my confidence and self-esteem and given me a real sense of purpose in working on a project to help others".

**Catherine** is 21 years and lives in Traralgon. Catherine is a full time uni student studying Communications and Writing, a radio presenter, Youth Councillor and volunteer with Alt Art, (a local organisation dedicated to supporting emerging artists). Catherine says "I'm also a parent to eight chickens and two cats, a waitress and a casual disability support worker". "I was blown away by the co-design approach to this project, a model where young people have been treated as capable and important future leaders. I have been involved from the beginning of the project and have learnt a lot about myself and been given the opportunity to take measured social and leadership risks, and try again to keep becoming a better leader, team member, and designer. This has helped me build resilience, which has seen me tackle challenges and conflicts better in every facet of my life."

**Takudzwa "TK"** is 18 and lives in Traralgon. TK moved to Traralgon from South Africa about 18 months ago and has become actively involved in the Latrobe Valley community. TK is proud of his Zimbabwean heritage and is a member of the Centre for Multicultural Youth's (CMY) Youth Reference Group, a keen soccer player and one of the College Captains at Traralgon College this year. TK says he has had difficulty achieving his goal of landing a part time job in the Valley. He hopes that by being part of the Youth Space project he can make a difference to the opportunities available to young people in Latrobe and help young people have a positive view of the community.

**Leticia** is 19 years and has lived in Morwell all her life. Leticia is a proud Gunaikurnai young woman and has a strong connection to her Aboriginal culture. Leticia completed Year 12 last year and is currently undertaking further study with the Koori Unit at Federation Training. Leticia is a keen footballer, enjoys music and also volunteers at the Gathering Place in Morwell. Leticia has enjoyed being part of the Youth Core Design Team as she has met a whole range of new people and feels she has been part of something positive for Young People in Latrobe. "It's really pushed me to get out of my comfort zone and take a leadership role".

**Taylah** is 19 and lives in Morwell. Taylah has lived in Morwell all her life and says she did not have a very positive time during her schooling years. Taylah enjoys sport and music but had become a bit isolated since leaving school. Taylah says being part of the Youth Core Design Team has helped bring her out of her shell, meet new people and build confidence. Taylah is looking forward to continuing her involvement with the Youth Space when it opens and hopes it will make a real difference to other young people who need to get out and get involved.

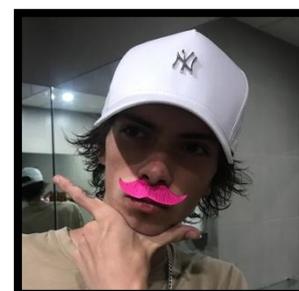

**Kristi** is 17 and lives in Moe. Kristi describes herself as a shy person who takes a while to come out of her shell. Kristi moved to the Latrobe Valley about a year ago and has lived in many locations in Victoria, NSW and Queensland. Kristi is currently studying VCAL at Federation TAFE and hopes to pursue a career as an Educational Aide. Kristi says her involvement in the Youth Core Design Team has helped build her confidence and make new friendships. “My involvement in the Youth Space project has really helped to make me start to feel like this community might be home”. “Some of the things we’ve done have really pushed me out of my comfort zone. Being in a leadership role and helping to facilitate the workshops with other kids has been challenging but really good for me”.

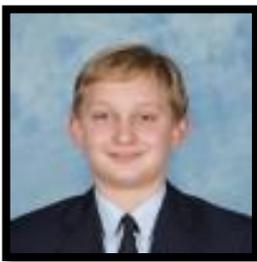

**Josh** is 22 and lives in Traralgon. Josh completed his secondary schooling in Traralgon and Maffra. Josh worked in construction for a couple of years after completing Year 12 and has now returned to study a Bachelor of Mechatronic Engineering at Federation University. Josh says he loves living in the Latrobe Valley and hopes that by being a part of the Youth Space project he can contribute towards a more positive view of this community amongst Young People. “I’ve learnt lots about myself and others through being part of this project. I’m keen to build a sustainable future for the Latrobe Valley and to help inspire young people to be positive about the Valley”.

**Erin** is 18 and lives in Yallourn North. Erin is currently studying Year 12 at Lowanna College and says that although she’s not sure what she wants to study next she loves school and is a keen and committed student. Erin loves to travel and plays netball. “Through this project I’ve met a lot of new people and by working alongside them I’ve learnt to put my own prejudices aside and have become more open minded. Before the project, I was surrounded by people, all in the same situation and experiencing the same things as myself. This project has opened my eyes to the challenges for many people living in Latrobe and has taught me to look beyond stereotypes. I now understand there are a lot of people throughout Latrobe Valley with huge aspirations and who want to make a difference. “

**Matt** is 19 and lives in Traralgon. Matt grew up in Melbourne and has moved to the Latrobe Valley about 1 year ago. Matt is currently studying Year 12 at Federation Training and enjoys basketball, soccer and music in his spare time. “I got involved in the Youth Space project because I live in the east end of Traralgon and see lots of young people with no role models or guidance. Being part of this project has brought me a sense of connection to my new community and has opened my mind to a whole range of things to get involved in.”

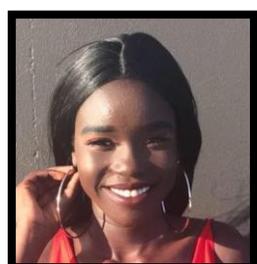

**Nathan** is 15 and lives in Jeeralang Junction. Nathan attends Lavalla Catholic College and is currently studying Year 10. Nathan has lived in the Valley all his life, mostly in Churchill and then moving out of town about 18 months ago. Nathan enjoys science, gaming and computer programming. Nathan says his involvement in the Youth Space project has brought him out of his shell and given him a new confidence to speak up. "When I first joined I was really shy but I've found my voice. I'm even speaking up at school which has surprised my friends and teachers".

**Felicity** is 16 and lives in Traralgon. Felicity is currently studying Year 12 at Federation Training and hopes to continue on to further training in Hair and Beauty. Felicity moved to Traralgon about 2 years ago having lived in Melbourne for all her life. Felicity says she has really enjoyed getting to be part of the Youth Space project. "When I first moved here I found it really hard to make friends and I struggled with going to a new school". "Being part of this project has helped me feel part of this community and I've felt really good about being part of something positive for young people in this community. If I can create something that will help others feel like they belong that will be great".

**Noel** is 21 and lives in Morwell. Noel is interested in table top gaming, video gaming and is a keen members of Scouts. Noel is currently looking to secure a full-time job somewhere in the Latrobe Valley. Noel says he has benefitted greatly from being involved in Leaving Care Mentoring and the L's to P's program with Berry Street. "I'm glad that Berry Street suggested I get involved with the Youth Space project. It's really opened my eyes to the challenges that other young people are experiencing in Latrobe. I hope that the Youth Space can offer additional ways to get involved and feel a sense of belonging I have experienced through my involvement in community activities.

**Jacob** is 18 and lives in Churchill. Jacob is currently studying VCAL at Federation Training. Jacob is into motocross and car racing and hanging out with his friends. Jacob hopes that the Youth Space will provide a whole bunch of fun activities for Young People including cooking and free food.

**Angeth** is 18 and lives in Traralgon. Angeth is currently studying Year 12 at Traralgon College and hopes to go to University after completing secondary school. Angeth and her family are actively involved in the South Sudanese community in both the Latrobe Valley and Victoria. Angeth would like to see lots more study and employment options in the Valley so that Young People don't feel like they need to move away.

**Stan** is 23 and lives in Moe. Stan recently moved to the Latrobe Valley area having grown up in New South Wales. Stan currently works as a Youth Worker at headspace Morwell and is has been a member of the Latrobe City Youth Council. Stan says that when he first moved to the Latrobe Valley he struggled to find any information about what support was available for young people. "I'd just moved here and didn't have internet so finding what was available for Young People was really hard. I hope that the Youth Space can be a central point for Young People to access all the information they need about what's on offer for Youth in the Valley.

**Sophia** is 19 and has lived in Traralgon all her life. Sophia has recently relocated to Melbourne and has commenced at University studying Arts and Law. Sophia is a keen musician and singer who regularly performs in local venues around the Latrobe Valley. "I'm looking forward to seeing what a difference the Youth Space can make to young people in the Latrobe Valley".

# YOUTH SPACE LATROBE

In April 2017, the Minister for Youth Affairs, Jenny Mikakos MP, announced \$4.3 million in new funding from the Victorian Government over the next three years for a new Youth Space in Latrobe City.

Co-design (Collaborative Design) was selected as the most effective method to ensure the development of the Youth Space actively and strategically involved all relevant stakeholders, most importantly the young people themselves.

The Co-Design process has been facilitated by the Office for Youth (DHHS) in partnership with consultants Peer Academy and seeks to empower local young people to take the lead in the Co-Design process.

## THE PROCESS:

### INQUIRE

- Broad consultation with Young People and stakeholders across the Latrobe Valley Community.
- Inquire Workshops and Pop-Up Listening Posts across Latrobe
- Recruitment to the Core Design Team of Youth People
- Introduction to Co-Design training workshop for Youth Core Design team – 12 Dec 2017.
- Core Design Team engage in gathering stories of the lived experience of Young People through a series of one-on-one interviews, pop-up listening posts and presence at youth and community events.
- Data Analysis Workshop with Core Design Team – 12 Jan 2018

### IDEATE

- Ideation Workshop with Core Design Team – 10 Feb 2018
- Design workshops including 50 Young People from across Latrobe - 15 & 16 Feb 2018
- Short workshops to refine design principles for Youth Space Latrobe – 20, 27 Feb & 6 March 2018

### PROTOTYPE AND PITCH

- Design Principles for Youth Space Latrobe confirmed through a series of workshops with the Core Design Team – Feb/Mar 2018.
- Community and stakeholder consultation on the Design Principles – March 2018
- Pitch and Presentation development workshop – 10 March 2018
- Pitch to the Minister for Youth Affairs/Local Member for Eastern Victoria – 20 March 2018

## STAKEHOLDER FEEDBACK:

On 4th September 2017 the Co-Design process commenced with a community sector forum “Supporting Young People in the Latrobe Valley” which aimed to engage a broad range of stakeholders interested in the development of the Youth Space project. Representatives from over 30 community organisations came together to discuss what is happening across Latrobe. The focus was on exploring ways the co-design process could empower Young People to share their views on the priority issues and to identify ways in which Young People can be supported to live the life they wish to live in Latrobe.

Organisations represented included:

- Anglicare Victoria
- Baw Baw Latrobe Local Learning and Employment Network
- Berry Street
- Centre for Multicultural Youth
- Department of Education and Training
- Department of Health and Human Services
- Department of Justice and Regulation
- Kurnai College - Flexible Learning Option
- Gippsland Primary Health Network
- Gippsport
- Quantum Support Services
- Latrobe City Council
- Latrobe Community Health Service
- Latrobe Health Assembly
- Latrobe Valley Authority
- MIND
- Ramahyuck
- Sport and Recreation Victoria
- The Smith Family
- Youth Support and Advocacy Service

### Question 1

How can young people be supported to live the life they wish?

•Offering numerous and diverse opportunities to young people in Latrobe would deliver greater benefits. Most responses reflected on the need for employment options for young people. Other responses emphasised the important role of sport and recreation, as well as the need for education and career pathways.

- Young people need to feel a sense of ‘direction’ (raised 10 times)**
- ‘Service delivery’ needs to be comprehensive to improve outcomes (raised 6 times)**
- Better (and more) education and training pathways are required (raised 4 times).**

### Question 2

What are the priority issues for young people?

•A lack of accessible recreational activities available was cited as problematic. Similarly, limited opportunities to enter gainful employment or move around Latrobe on public transport were flagged as challenging. Many respondents raised the prospect of expanding of allied services across mental health, social inclusion, substance abuse and housing.

- Lack of accessible recreational activities available to young people (raised 7 times)**
- Concern about lack of employment options and pathways (raised 7 times)**
- Need for effective education and training opportunities (raised 6 times)**
- Insufficient and/or inaccessible public transport (raised 3 times).**

### Question 3

What is required to support young people in Latrobe?

•The responses made clear that a physical ‘youth space’ was only useful as long as it was used effectively, encompassing diverse services and projecting an ‘inviting vibe’. Respondents emphasised the need for the space to be ‘safe’. There was a sense that the bricks and mortar of the space ought to be secondary to the activities and engagement provided.

- Need for a ‘youth friendly space’ or ‘safe/welcoming space’ (raised 4 times)**
- Need for capacity building, mentoring and interpersonal support (raised 6 times)**
- Need for comprehensive and more accessible public transport (raised 7 times).**

## WORKSHOPS WITH YOUNG PEOPLE:

Through a series of Pop-Up listen posts and group workshops the voice of young people was gathered to inform the development of the Youth Space project.

Workshops with groups of Young People were held with:

- Latrobe Youth Council
- Centre for Multicultural Youth Reference Group
- Strzelecki District Scouts/Rovers
- South Sudanese community young people
- Kurnai College Student Representative Council
- Traralgon College Students
- Trafalgar High School Students
- The Gathering Place – Koorie Young People
- Federation Training VCAL Students

### Issues:

What are the issues young people face in Latrobe?

## Issues

Safety	Discrimination	Lack of opportunities	Recreation	Drugs, alcohol & mental health	Transport
	Racism	Work	Adventure	Underage drinking	Unable to attend activities
	Sexism	Education	Art/dance	It's not cool to ask for help	Unable to get to school
	Bullying	Future pathways	Limited entertainment		
	Underestimating youth		Places to explore		

### Aspirations:

What are your dreams and aspirations for young people living in Latrobe?

## Aspirations

Employment opportunities	Entertainment / social activities	School & university courses	Skills development	Wellbeing and Mental Health
Career in media	Art	Support to access education	Driver licence training	Support groups
Sport related careers	Sport	• Public libraries to close later	Support to gain employment	Support in school i.e. safe people to talk to
• Businesses employing young people	Programs	• Experience of university during school	• Free driver licence course	Training in schools
• More work experience opportunities	• Markets - employment opportunities	• School to create pathways to university according to individual talents/interests	• Financial literacy course	• More support people in schools i.e. therapist, counsellors, nurses
• Schools support young people to get employment	• Dance studio	• University excursions		• More 'Are you OK?' days
	• Outdoor events	• Preparation prior to university		
	• Theme parks	• Scholarships		
	• Better public transport			
	• More light in public spaces			
	• Art/Theatre/Music			
	• Family friendly activities			
	• Civic involvement			

## COMMUNITY POP UP LISTENING POSTS:

Community Pop-up listening posts were held at:

- Mid Valley Shopping centre
- Traralgon CBD
- Moe CBD
- Churchill Skate Park
- Federation University Cafeteria & Student Lounge
- Kurnai College University Campus
- Traralgon College – Junior and Senior Campuses
- Trafalgar High School
- Traralgon Summer Nights Festival
- Morwell and Churchill Skate Park Events

Respondents' reported gender

Respondents' age range

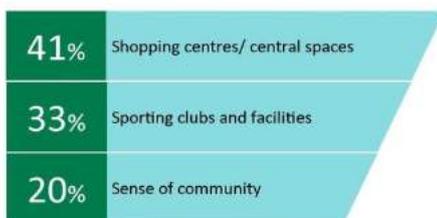

Young people 12-24 said:

"There's not enough to do"

"Everyone is pretty friendly"

"It's hard to find a job"

The best thing about Latrobe as identified by 12-24 year olds

The top challenges in Latrobe as identified by 12-24 year olds

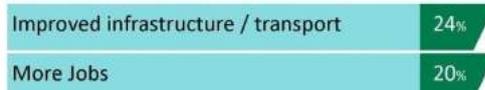

When residents aged 25+ were asked "what's it like for young people here?"

When young people were asked to identify their goal for the future

What would you change?

## UNDERSTANDING THE LIVED EXPERIENCE OF YOUNG PEOPLE IN LATROBE:

What is it like to live in Latrobe as a Young Person?

Is staying in Latrobe part of your future?

What do you need to help reach your goals?

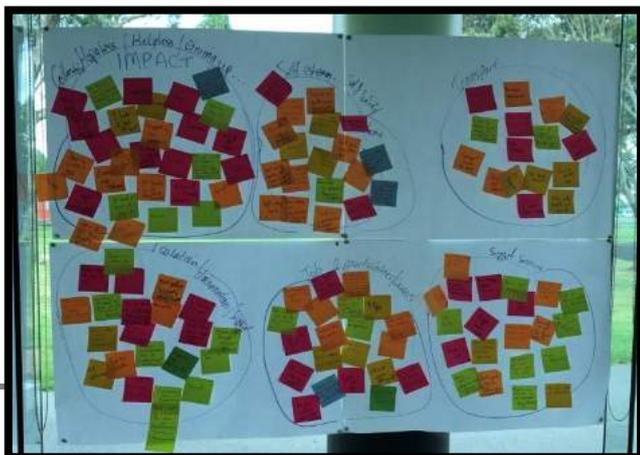

What will improve connection & belonging?

On 12 December 2017 the first workshop for the Core Design Team provided an orientation to co-design. This workshop took Young People through the Co-Design process, providing insights into developing empathy and charged the team with the mission of understanding the lived experience of Young People in the Latrobe Valley. Through one on one interview's, conversations, pop-up listening posts and online line feedback the team gathered rich data about what it's like to live in Latrobe as a Young Person; what's working well; what's missing and what's needed to help Young People reach their goals for the future.

On 12<sup>th</sup> Jan 2018 the Youth Core Design Team members came together to analyse the themes revealed in the stories.

The following themes were revealed:

- Recreation - access to affordable activities, events and recreation for Young People.
- Information – a central point of access to information about what is available for Young People in Latrobe and beyond.
- Jobs – opportunities to find jobs, opportunities to create jobs, skills for jobs of the future.
- Transport – cost, accessibility and perceptions of safety.
- Resilience – life skills, self-esteem and hope for a future in the Latrobe Valley.
- Support – life skills, timely access to support services, relationships.
- Connection to Community – the need to build connection between Young People, between the towns of the Latrobe Valley and between Young People and the community.
- Indigenous Culture – youth celebrations, connection to elders, opportunities for all Young People to learn and celebrate Aboriginal culture.
- Safety – need to increase perceptions of safety across the towns of Latrobe Valley.
- Pride of place – building a positive reputation for young people and the whole Latrobe Valley.

HOW MIGHT WE IGNITE PRIDE IN THE  
YOUNG PEOPLE OF LATROBE THROUGH  
CONNECTION, INSPIRATION AND  
SUCCESS?

## THE DESIGN WORKSHOPS:

The Youth Space Latrobe design workshops were held on Thursday 15<sup>th</sup> and Friday 16<sup>th</sup> February 2018 at the Italian Australian Club in Morwell. The workshops invited Young People 12-18 years on the first day and 18-25 years on the second. Across the 2 days over 50 young people together with 20 youth workers and teachers took on the task of prototyping a Youth Space for the young people of Latrobe.

Facilitated by Claire McEwan and Kylie Long from Peer Academy the workshops offered Young People a free space to engage their creativity and dream big around all the possibilities for Youth Space Latrobe.

A landing space at the beginning of the event immersed the participants in the stories and data gathered to paint a picture of the lives of Young People in Latrobe.

Teams made up of young people from different schools, backgrounds and age groups worked together in a fast paced, collaborative and user-centred environment. Drawing on the principles of co-design, participants worked to address the problem that had emerged from the data:

**“Young People in Latrobe feel it has nothing to offer them in the way of opportunities, connection and self-belief. Many have disconnected and feel isolated or see their future somewhere else.”**

From this problem emerged the opportunity for Youth Space Latrobe:

**How might we ignite pride in the Young People of Latrobe through connection, inspiration and success?**

The goal of the Co-Design process has been to ensure the voices of the Latrobe Valley young people have been heard. Through these voices and the input of our community a set of design principles have emerged to guide the construction, operation and location of Youth Space Latrobe.

**“ Youth Space Latrobe is about building connection, pride and success for the Young People of the Latrobe Valley.**

**Connection to each other, connection to information and connection to opportunities.**

**Reaching out into the community from one central space, Youth Space Latrobe breaks down barriers between young people and creates a place of safety for belonging, innovation and reaching your potential.”**

- 1. CONNECTION:** The purpose of Youth Space Latrobe is to enable young people to better connect with each other, strengthen the community and break down stigma.

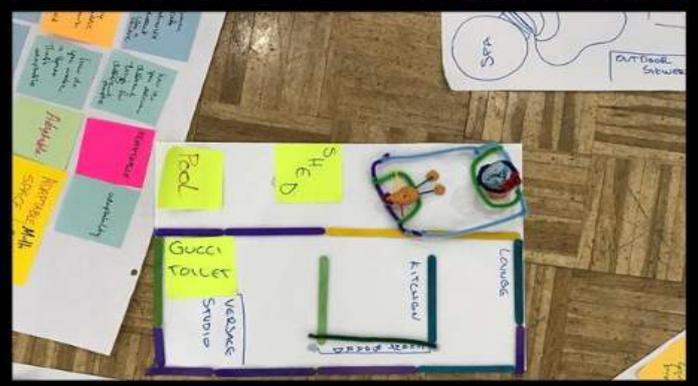

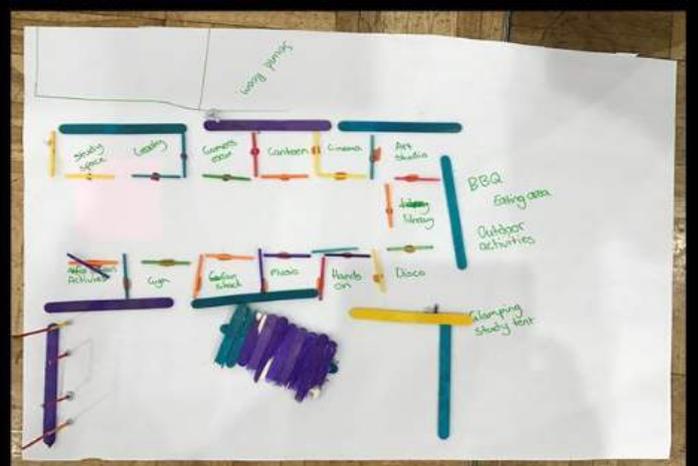

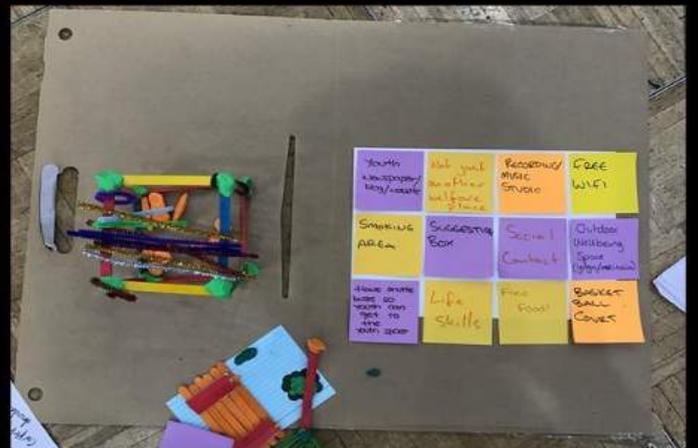

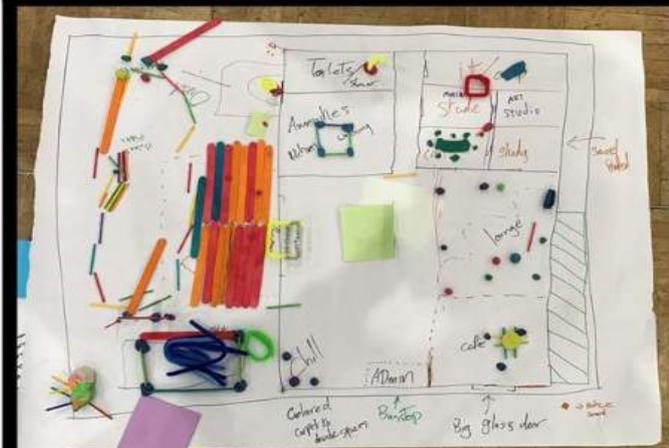

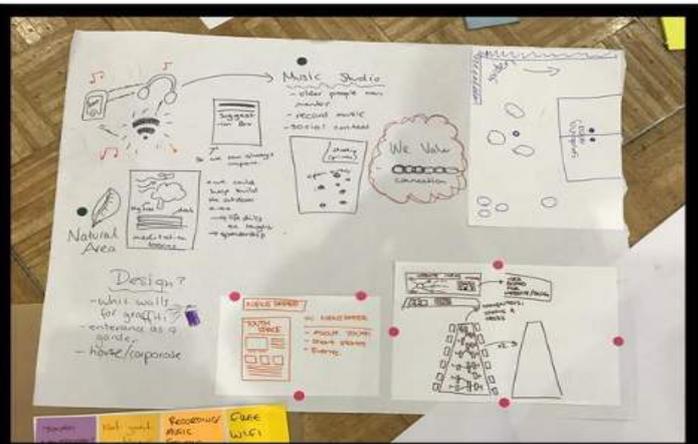

To do this, all aspects of architectural design and program delivery should be designed to enhance young people's connection to their community. Suggestions include:

- assisting young people to access existing facilities in the community
- links to employment or educational opportunities
- including health and wellbeing initiatives
- providing flexible and available transport
- using technology to connect with the broader community
- promoting connection with the natural environment.

The Space should be a single, central site with designated shuttle buses, enhanced public transport options and an online platform. The Youth Space could also build connection with young people through a 'mobile operations centre' that takes Youth Space activities out to all communities throughout Latrobe, particularly the small towns not linked by public transport.

- 2. TRANSPORT:** Young people feel that good transport and easy access to Youth Space is critical to its success. Young people want to access Youth Space through flexible transport options, including:

- improved public transport
- designated Youth Space shuttle buses
- night-time transport to assist getting home safely after-hours
- a smartphone application for individualised transport.

- 3. YOUTH LED:** Young people expressed strong interest in having an ongoing ownership of Youth Space Latrobe. It should directly employ young people in Youth Space’s management, service delivery and capital works. Youth Space should also empower youth leadership by enabling young people to lead community projects or to respond to issues arising in the Latrobe Valley.

This could include, but is not limited to:

- establishment of a youth board
- youth-run activities and events
- peer to peer mentoring
- youth in employed leadership positions
- youth-run café enterprise or other social enterprises
- an ‘ideas incubator’ space that helps provide workshops and spaces for youth-run projects.

- 4. INCLUSIVE, SAFE AND INVITING:** To better connect with young people, Youth Space Latrobe needs to be an open, accessible and safe space for all young people, regardless of age, gender, ethnicity, sexual orientation and ability.

It is imperative that the Space does not feel like an imposing government building or service interface. Architecture and program delivery therefore needs to be an inviting, warm place that attracts young people. Suggested ways to do this include:

- a garden or café entry
- house style facades
- youth workers with broad unimposing roles to support young people’s engagement with the space, support the facilitation of programs and to link young people into additional support where needed
- being inclusive of young parents and their children
- connecting with multiculturalism
- providing opportunities for Aboriginal young people to celebrate and share culture.

- 5. MULTI-PURPOSE:** Youth Space Latrobe needs to be adaptable and flexible to better capture the multitude of ways young people will interact with the space.

The space will offer a wide variety of activities, services and opportunities including:

- social enterprises and cafés
- informal and formal approaches
- fun and engaging activities
- educational and creative workshops
- employment pathways
- health and wellbeing services, including referral pathways to local welfare services for young people needing additional support.

Young people see that the architecture will reflect this adaptive and multi-purpose element by including:

- adaptable spaces with movable walls
- quiet areas, study spaces or ‘chill zones’, with cozy atmospheres, sound-absorbing walls
- outdoor and garden spaces
- sport, recreation and multi-sport court area
- arts spaces
- inclusion of spaces for young people to inhabit even when the centre is closed.

**6. ENVIRONMENT AND SUSTAINABILITY:** Young people feel Youth Space should promote a connection with the natural environment.

The architecture would incorporate:

- natural elements
- a seamless transition between the indoor and outdoor spaces
- environmentally sustainable features.

Young people also expressed strong interest in providing hands-on experiences at all levels of the food chain, including:

- the establishment and maintenance of community gardens
- a commercial kitchen and cafes
- promotion of healthy eating and freely available food options.

**7. TECHNOLOGY:** Youth Space Latrobe will be at the forefront of technology that connects young people to each other, information and opportunities on offer throughout Latrobe. The facility will have free high-speed WIFI and offer young people in Latrobe the opportunity to access and experience a range of innovative technology to connect to the world online.

An online Youth Space platform will further enhance a sense of connection and community by reflecting the design principles by being inclusive, youth led, linking in with social media and offering a multitude of ways for young people to interact.

**8. PROGRAMS AND FACILITY:** Young people see Youth Space offering opportunities for them to explore pathways to education, employment and creativity. Young people see this as including:

- a focus on music, visual and performing arts, and sound studio/DJ booth
- sport and recreation
- technology
- animal welfare
- a focus on food through formal and informal approaches
- youth and social groups
- a café enterprise and social enterprises
- a focus on learning life skills.

**9. RECOGNITION AND COMMUNITY:** Youth Space Latrobe will focus on the mutual reciprocity between young people and their community. It will be a space of giving back, providing leadership and teamwork opportunities and acknowledging the contribution of young people.

Young people have recommended establishing a credit system for people involved in Youth Space. Young people would earn points through their contributions, volunteered time or achievements that can be redeemed at the Youth Space or as a method to support access to other community facilities.
